### 1 | LABEL

Carefully peel-off a plant tag. Insert the tag into a plant.

### 2 | TEST

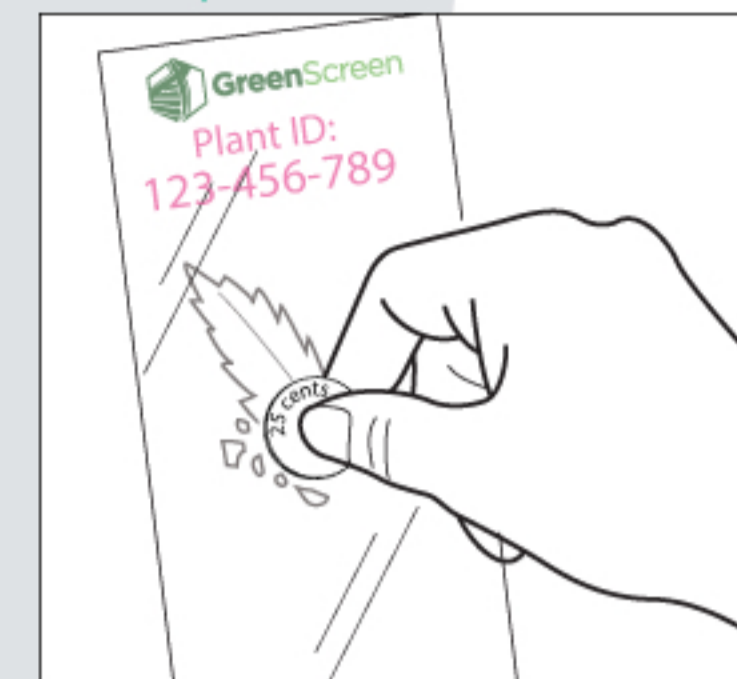

Remove the test paper from the pouch. Ensure the Plant ID matches the plant tag removed in step one. To avoid a mix-up, please remove and work with one imprint at a time.

### 3 | PREPARE

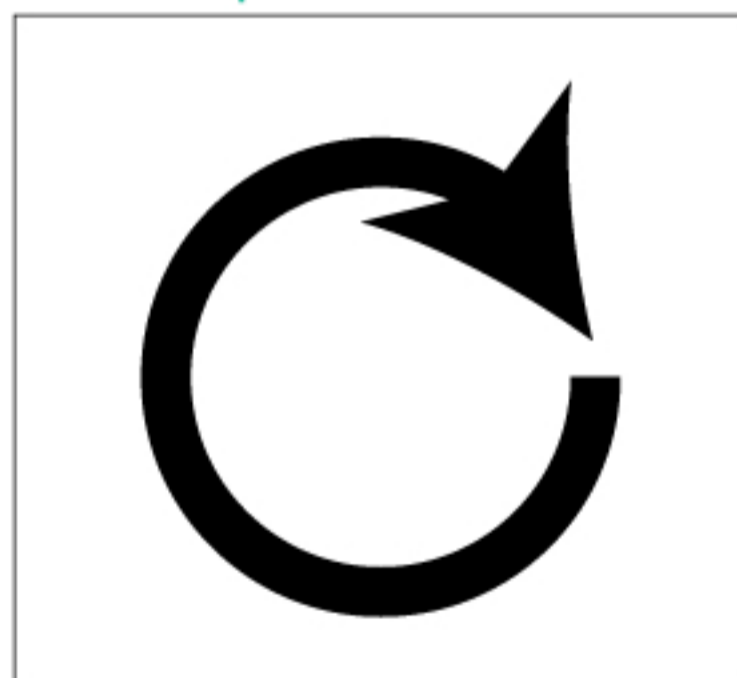

Using sterile scissors, carefully clip a small leaf from the labelled plant. Place the clipping on the provided test paper.

### 4 | COMPLETE

Position the plastic covering over the clipping and rub firmly. **THROW AWAY PLASTIC COVERING** and place the test paper back in the pouch.

### 5 | REPEAT

Repeat steps 1-4 for the remaining tests. Please work with one imprint at a time.

### 6 | REGISTER

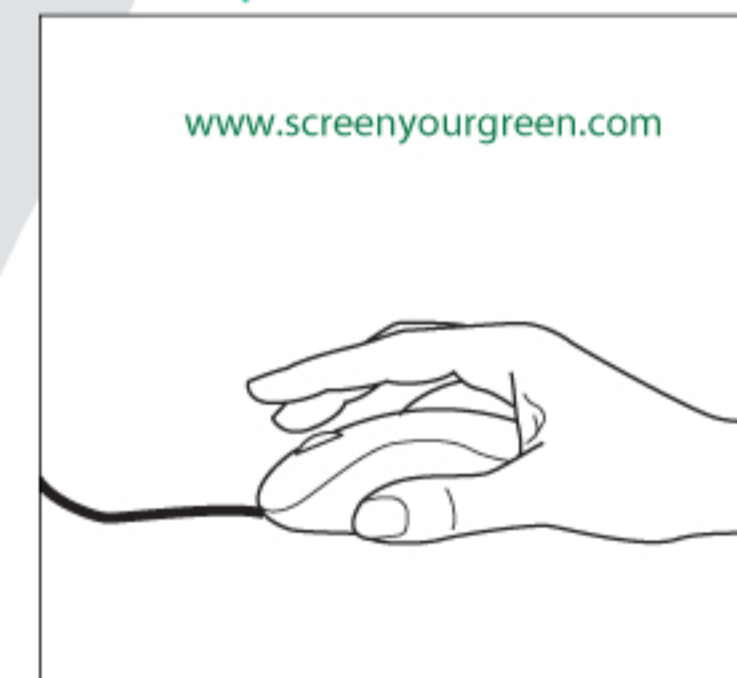

Register your Lot ID and pre-pay for your tests at:  
[screenyourgreen.com/register](http://screenyourgreen.com/register)

### 7 | MAIL

Place your completed test in the return envelope provided and send it off to us. Postage is not included on the envelope.

### 8 | RESULTS

The status of your kit can be easily accessed by visiting [screenyourgreen.com/results](http://screenyourgreen.com/results)
